Devices. View network connections Allows the app to view information about network connections, such as which networks exist and are connected. View Wi-Fi connections Allows the app to view wifi network information, such as whether Wi-Fi is turned on and the name of connected Wi-Fi devices is turned on. full access to the network Allows the application to create network sockets and use its own network protocols. The browser and other applications provide the means to send data to the Internet, so this permission is not required to send data to the Internet. reading SD card content Allows the app to read the contents of your SD card. startup Allows the application itself to start as soon as the system has finished downloading. It can take longer to start your phone and allow the app to slow down the overall phone, always working. Ban Phone Sleep Allows the app to prevent your phone from sleeping. change or delete the contents of your SD card Allows the app to write to an SD card. set alarm Allows you to set alarms in the set alarm program. Some alarm programs may not perform this function. Receive Data from the Internet Allows apps to take the cloud to device messages sent by the app service. Use of this service will incur the use of data. Malware may cause excessive data usage.
