If the sound of the acoustic signal sounds and the temperature indicator flashes, press and hold the alarm mute button. Note: Once turned on, the appliance needs about 2/3 hours to reach the correct temperature to store a typical volume of food. If applicable, place the antibacterial and anti-smell filter as indicated on the filter package. When the appliance is not in use, disconnect the appliance from the power supply. Empty the appliance and leave the doors open only so that the air can circulate inside the compartments. This will prevent the formation of mold and bad odors. If your appliance has an automatic ice manufacturer: 1. Turn off the water supply to the product. 2. Empty the bucket with the ice. In case of blackouts lasting up to 12 hours, the doors of the appliance shall be closed. Thus, the stored food will remain cold for as long as possible. If the power outage lasts more than 12 hours, remove all foods from the product and store it in an appropriate appliance. MAINTENANCE AND CLEANING The appliance regularly cleans the appliance with a new cloth and solution of lukewarm water and a neutral detergent specific to cleaning refrigerators. Never use abrasive detergents. Do not use steam cleaners. Clean the condenser with a vacuum cleaner after removing the front plinths (see Installation Guide). The buttons and display of the control panel (in some models located on the freezer door) should not be cleaned with alcohol or alcohol-derived substances, but with a dry cloth. Changing bulbs Important: • Always disconnect the refrigerator from the power supply before replacing light bulbs. • Before changing the bulb, remove the lamp cover (if available). After changing the bulb, reinsert the lamp cover. • Indoor lights are bayonet bulbs. • If any, the water and ice dispenser is normal, although some models may have LED light. • LED lights last longer than regular bulbs, better illuminate the inside of the appliance and are more environmentally friendly. Use only bulbs of the same type that can be requested by the after-sales service and authorized dealers. If the appliance has an LED lamp, contact the workshop after sale when replacement is required. Requires.
